DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see page 4, filed 3/26/2004 with respect to claims 1 and 5 have been fully considered and are persuasive in light of the amended claims filed 3/26/2004. The rejection of claims 1 and 5 has been withdrawn.

Allowable Subject Matter

2. Claims 1 and 5 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Although the closest prior art (in the form of Ke et al. US 6,284,093) suggests the use of a Si focus ring, it does not suggest that the ring have the specified oxygen and nitrogen impurities coupled with a removed surface mechanical damage layer by an etching process. The production method making such a focus ring was also not suggested in the prior art although the individual steps were common for semiconductor wafer processing with the exclusion of the step of processing the Si into the ring shape.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
